

■ Onelan Training Requirements

Half day training session or full day training session.

For up to nine people in any one session.

Issues covered in the training will be;

- Uploading media to NTB
- Creating playlists within zones
- Adding special items into playlist. I.e. live TV, web pages
- Customisation of the NTB
- Layout & template design
- Schedule of layouts
- Ad-hoc page design
- User password set-up. Initial set-up of TV channels

The training will be conducted on the trainers Onelan NTB.

Please have available any media you wish to display in the correct format e.g.

- Movie clips must be as M-peg 1,2, or 4 (DivX), AVI2, Real or QuickTime2,
- Images must be j-peg, png, bmp, Gif, Tiff
- Fonts must be .TTF
- Text must be as a Microsoft word document or a txt file

Please have the media available on either a USB memory stick or a CD-rom.

After the training a copy of the layout will be provided as a zip file for you to upload on to your NTB's via the layout packages facility (Version 5.1.0 or higher software required).

Please note that Red Solutions Ltd is not responsible for any installation or network configuration of the Net Top Box on the day of training unless previously organized.
